

PHOENIX ACADEMY

TYPE I ULTRAURE POU WATER SYSTEM

BASIC CHEMISTRY
ACADEMIA
IC BUFFERS

Designed for general laboratory applications, the Phoenix Academy delivers 2.5 LPM of Type I, 18.2 Megohm water quality on demand. The water is purified using a multi-stage purification process. In the two-step deionization stage, source water passes through high-purity ion exchange resins to remove dissolved minerals. A subsequent stage uses a 0.2 micron filter to remove particulates and bacteria before dispensing. The result is water that meets universally recognized Type I specifications.
